

BENGT RASMUSSEN received his medical degree at Karolinska Institute, Stockholm in 1999. He is working as a senior Consultant at the division of Hematology, department of Medicine at Örebro University Hospital. He is regional coordinator for myelodysplastic syndromes in RCC Uppsala-Örebro and a member of the Nordic MDS group. The research work of this thesis started in 2011 under the supervision of Professor

Ulf Tidefelt and was completed under the supervision of Associate Professor Lars Möllgård.

Patients with high-risk myelodysplastic syndromes with chromosome 5 deletion have a very poor prognosis and it is essential to find new treatment strategies to improve the outcome for patients with this disease.
